75.54% |
| • | Shamarya Kanya high secondary school Udgir
10 th - | 2018
78.40% |

Projects

- **Employee CRUD System:**

Built an Employee Management System using Node.js, where you can add, view, update, and delete employee details. The project uses Express.js for the server, MySQL for storing data, and EJS for the user interface. It helps manage employee records easily with a clean and user-friendly design.

Role: I built features to add, edit, view, and delete employee records, designed user-friendly pages with EJS and Bootstrap, and connected the app to a MySQL database using the MVC pattern.

- **Crime Reporting System**

Developed a Crime Reporting System with HTML, CSS, and PHP, enabling users to register FIRs and track their status. The system offers a user-friendly interface for secure crime reporting, with real-time updates on case progress. PHP handles data storage and retrieval, while HTML and CSS ensure smooth navigation.

Role: Working on frontend.

Technical Skills

Programming Languages : Core JAVA ,JAVASCRIPT, NODE.JS, PL/SQL

Web Development : HTML,CSS

Database : MYSQL

Development Tools : Eclipse, Vs Code,GitHub,Jira

Certification

- Java Full Stack Developer(Giri TechHub).
